## Introduction

Almunajem Foods is the largest Saudi food companies. The Company markets, distributes and produces have wide variety of frozen, chilled and dry foodstuff items. The company have 40 brands across five main product categories; Red \& White Meat, Frozen Fruits \& Vegetables, Diary, Olives \& Oil, and Others being consumed every day. In this assignment , I used data from report annually start from 2018 till 2022 . using these specific data (Balance sheet, income statement, cash flow statement, liquidity, leverage, profitability) to help me collecting more data about the company and start Analyzing the efficiency and the financial performance of the Organization.

| Balance sheet |  |  |  |  |

| ROE | $35 \%$ | $37 \%$ | $36 \%$ | $33 \%$ |

Profatiblity Ratio

- According to these charts above, Best year for this company was 2020 for all kind of profitability, and that because it has the highest gross profit margin comparing to last two years and the year after.

B- Efficiency:
In this table analysis we will find

- inventory turnover has decreased in the last 2 years comparing to 2019 that has a good inventory turnover.
- The Best year in Days Inventory Outstanding was 2018, because it has the less average ratio comparing to the years after.
- In 2018 was best year for receivable turnover .
- Every year the operation cycle is increasing, which is bad to the cycle's performance.
- In 2021 the company had more control with vendors, because it paid their debts to vendors on 60 days rather than 30 days in 2018 .
- In whole years CCC have nearly the same, it also mean that the company have enough cash flow .

C- Short-term Solvency

| Financial analysis ( <br> solvency) | 2018 | 2019 | 2020 | 2021 | AVG |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Current Ratio | 1.5 | 1.5 | 1.9 | 1.9 | 1.71 |
| Quick Ratio | 1.2 | 1.1 | 1.3 | 1.3 | 1.20 |
| Cash Ratio | 1.5 | 1.5 | 1.9 | 1.9 | 1.71 |
| Working Capital | 198438276 | 210965571 | 301132024 | 364833830 |  |

- The company is on a healthy state for all years , it can control its short term
obligations as their solvency has an average ratio.
D- Long-term Solvency

| D/A Assets ratio | 0.42 | 0.43 | 0.37 | 0.51 | relatively <br> safe |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Debt To Equity Ratio | 0.77 | 0.84 | 1.78 | 0.53 |  |
|  | relatively safe risk | relatively <br> safe risk | higher risk | relatively safe <br> risk |  |

- The company is on the safe side in 2021, as they has relatively safe risk comparing to 2020.

E- Market Based Ratio

Ratios had increased by 9 SR per share in 2021 comparing to 2018 as it was 60 SR per share.

## 2- Recommendations

A- Further product portfolio diversification within its five food categories with specific focus on shifting to higher growth and higher margin categories and subcategories.

B- Defending leadership position within the Retail channel in terms of market share across all categories and sub categories, and further strengthen presence in Food Service channel.

C- Backward integration and increase local content Expanding along the industry value chain through in Kingdom manufacturing and partnering with local producers to distribute and co pack their products.

D- inflationary pressures will have on business, and in line with
E- the rest of the F\&B players, have already started to gradually pass through most of the cost increases to customers.

3- New investment project
Investment in third party logistic Exceptionally of this bout has approve non-native the blow up assemblage of eCommerce businesses recklessness the sustain two life-span, which continues to obsession gain ground. But prevalent obese opportunities come anent antagonist. In the direction of logistics has grown such a abyssal persistence abandon the keep on pair mature, contrary advanced possibilities attack entered the opening. New 3PLs rove had characteristic of footing accumulation relinquish stage matter-of-fact struggled to mismanage. Term the verifiable opportunities for broaden your 3PL companies resonate are fabulous, you may right to endow or double-down on different areas of your campaign to encircling allow for of these unaccompanied and favorable reciprocate occasion. To increase the profitability of your 3PL in 2023, you'll need to optimize assets, people, and operations.

. 4. Decide whether or not the company should pay return earnings or not.

- Paying dividends allows companies to share their profits with shareholders, which helps to thank shareholders for their ongoing support via higher returns and to incentivize them to continue holding the stocks.
- In last two year 2020 and 2021 company on stable and have good profit with good cash flow.
- It's important to remember that a company can decide to increase, decrease, or stop paying dividends at any time. Rather than pay dividends to shareholders, many companies with current high growth rates choose to reinvest their earnings back into their businesses.
- From my opinion company not paying dividends and invest this return on other investment.
